Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-16 are rejected under 35 U.S.C. 102(e) as being anticipated by Ndondo-Lay (6,273,908).

Ndondo-Lay discloses a stent including:

A modified surface having a plurality of depots/pores and substances being deposited into the depots wherein the substances/drugs include carbon (col. 5, line 52 to col. 6, line 33),

A polymeric coating/film as claimed (see col. 8, lines 30-65) covering the depots/pores containing deposited substance wherein the polymeric coating is formed by conventional method such as plasma polymerization (see col. 8, lines 30-65)

The stent being made from stainless steel (col. 4, lines 13-26); and

The depth of the substance deposit as claimed (col. 4, lines 27-67)

Art Unit: 3731

Conclusion

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. DE 19855786A1 discloses an expandable stent, especially useful for preventing restenosis of coronary arteries, is implanted with carbon to improve hemocompatibility and provided with a radioactive material to inhibit restenosis.
